Product Description

The Linear 1-Channel or 3-Channel Key Ring Transmitter is designed for use with Linear's access control products. The Model ACT-21A is a single-channel device supplied with a quick-disconnect key ring. The Model ACT-22A is a three-channel device. Pressing the transmitter's left or right front button sends channel one or two. Pressing both buttons sends channel three. Also included are lithium batteries with a five-year service life. A unique 10-second time-out feature prevents the system from being shut down by a single transmitter transmitting continuously. The transmitter is MegaCode format, which means each transmitter is factory preprogrammed with one of over 1,000,000 codes, virtually eliminating the possibility of code duplication. Because the receiver "learns" each specific code, no unauthorized person can gain access to the system by reprogramming a transmitter.

★★★★☆ **Worked out in the end with additional purchase**
 By [NiceNet@EzSwag](#) on March 27, 2012

Verified Purchase

This product is a "Learn" receiver. While its nice and small, it was not what i was looking for. I was looking for a 318mhz remote for my garage that had the +,-,&0 switches but that problem was solved after purchasing a new 318mhz receiver but for two doors you must buy two single channels or 1 multi channel. The receiver had a learn button which was compatible with the remote. Still Was only a total of \$48 with shipping for me so it was still relative to prices in stores.

★★★★★ **Works great!**
 By [Nathan L Elliott](#) on January 24, 2013

Verified Purchase

Super easy to program with megacode and great operating distance! Nice an small to put into pocket if you are out for a bike ride or walk.
